Mornings are best for Harry, too, since he is on the east coast. I will let you know later this week what will work best for him. I was thinking while you and Harry discuss the pros and cons of different approaches, it might be less distracting if there were no participants questioning some of the discussions, since they won't have as much statistical knowledge as the two of you. Then you could bring a consensus approach for statistical tests, or a limited number of options with pros and cons for discussion with a smaller group, and then a presentation to the entire Tiger Team so we can get approval on a path forward. Ideally that would happen at the April 4th Tiger Team meeting. I know the Navy does not want to wait until the April 18th meeting to get approval on a path forward. That also corresponds with our goal of having the datasets completed by the end of March (or at least enough where we can start the statistical runs while the last few data sets are being prepared and checked).

Scott - are people mentioned in your email working on evaluating data from Hunters Point?
I also submitted my initial evaluations to Lily and I think she would share that with the Navy.

Once approved by everyone, we can share that with the folks you mentioned in your email.

In any case - I can attend a call with the folks you mentioned in your email.

I think Lily (if she wants) should also attend.

Mornings work better for me. I am busy on March 29.

Perhaps March 27 morning will work?

Thanks.

anita

Anita,

We are still in the process of developing data files. None of the parcels are complete, and we are trying to bring them all along so they will all be available at the same time. Currently Parcel G has been scanned and the data have been extracted into electronic files, but we have not started the checks for accuracy and completeness (we are still working Parcel C trench and fill, Parcel UC1 trench, and Parcel B fill) and then they will need a final check of all corrections made to the data file. We consider this the most important step in the process, and want to ensure we have data that are complete and accurate before continuing.

I discussed some of your questions with Harry Chmelynski, He is not available this week, but expects to be ready to have detailed discussions with you next week. If you could provide me with your schedule, I will make sure we set up a time convenient for both of you.

The Navy and the HP from Oregon State have requested they "listen" to your discussions. I feel that might be counterproductive and misleading for your initial discussions. However, I would like to schedule a meeting between you, Dr. Chmelynski, Dr. Kathryn Higley from Oregon State, and Pat Brooks from the Navy later in the week if that works for you. If you prefer, I can also let them participate in the earlier call(s) if you think that is best.

Since I have no data and no files to transfer at this time, I don't think we need to meet this week.

In my previous email - I meant data for some of the survey units of Parcel G.

Scott - Do you have updated (complete and correct) data for Parcel G?

During the last meeting you mentioned that data file for Parcel G was still in progress.

Also - did you get permission from the Navy to share Navy's evaluation results for Parcel G?

I do not need the data for all 66 survey units of Parcel G.

If you have a complete and correct data for some of the parcels - I would be happy to work with

the partial data spread sheet.

Seems like you prefer to attend the call from your location.

However, If you can mail me data sheet(s) - I will appreciate it very much.

If deemed necessary (e.g., files too long to be mailed) - some day this week, we can

meet somewhere near the University to get the data files and/or discuss statistical methods etc.

Thanks.

Anita

Unless Anita has questions, we are still working on assembling complete and accurate data sets. The call this week should be pretty straightforward, just an update on where we are with the data sets.

Unfortunately Lyndsey is out of town for a work related trip. But Anita and Scott, maybe you can meet closer to one of your places?
